EDUCATION

- BACHELOR'S DEGREE IN SOFTWARE ENGINEERING**
IFRI - UAC
2021 - 2025
- HIGH SCHOOL DIPLOMA (BACCALAUREAT)**
Jean-Piaget II
2020 - 2021

TECHNICAL SKILLS

Languages & Frameworks

- Flutter
- Laravel
- React.js
- Next.js
- PHP
- JavaScript

Backend & Databases

- REST APIs
- MySQL
- Database Design
- API Integration
- Backend Architecture

Tools & Collaboration

- Git & GitHub
- GitLab
- CI/CD Workflows
- Trello
- Postman
- VS Code
- Figma

PROFESSIONAL SUMMARY

Software Engineer specialized in web and mobile application development with experience building scalable digital platforms, ERP systems, and modern user-focused applications. Skilled in Flutter, Laravel, React.js, and backend architecture with strong experience in bug fixing, API integration, and platform optimization.

Passionate about creating efficient and modern digital solutions while continuously improving technical and problem-solving skills through real-world projects and collaborative development environments.

PROFESSIONAL EXPERIENCE

MOBILE DEVELOPER — CODELAB (ON-SITE)

Fevrier 2025 – April 2026

- Maintained and improved multiple Flutter mobile applications and web platforms.
- Identified, debugged, and resolved technical issues to improve application stability and performance.
- Participated in the development of a Flutter-based e-commerce platform with responsive and user-friendly interfaces.
- Implemented and configured a mail server system for the PAL payment application to support automated client communication and transactional notifications.
- Collaborated with the development team to optimize application workflows and improve user experience.
- Contributed to feature implementation and platform maintenance across different projects.

Full-Stack Developer — Takeshi Nihongo Gakkou Platforms (Remote)

Janvier 2026 – April 2026

- Developed digital platforms for Takeshi Nihongo Gakkou, the Japanese language school operating in the sub-region.
- Built an informational platform dedicated to helping Japanese visitors discover Benin, its culture, and local opportunities.
- Developed a platform presenting the school's educational programs, course planning, schedules, and learning sessions.
- Designed responsive interfaces and implemented user-centered experiences to improve accessibility and navigation.
- Contributed to strengthening the organization's digital presence through modern and structured web solutions.

Software Developer – ERP Nodus (Remote)

Decembre 2025 – Mars 2026

- Developed a comprehensive enterprise resource planning (ERP) system for business management.
- Built backend features using Laravel and managed databases with MySQL.
- Contributed to system architecture and improved data processing efficiency.
- Collaborated remotely using modern development workflows.

PROFESSIONAL QUALITIES

- Organized and proactive
- Fast learner with self-taught mindset
- Adaptable to new technologies and environments
- Critical thinking
- Reliable and responsible
- Strong team collaboration skills

LANGUAGES

- French
- English
- Japanese

○ Mobile & Backend Developer — Fintech Platform (Remote)

Decembre 2024 – Fevrier 2025

- Contributed to the backend development and maintenance of a digital banking platform supporting international money transfer operations.
- Participated in the improvement and stabilization of the mobile application used by active users for financial transactions and account management.
- Resolved technical issues and optimized application performance to enhance reliability and user experience.
- Assisted in implementing secure backend functionalities and API integrations for transaction-related operations.
- Collaborated remotely with the development team using modern development workflows and agile practices.

○ Software Developer Intern – MAINFO (ON-SITE)

August 2024 – January 2025

- Contributed to the development and improvement of a POS (Point-of-Sale) solution used by merchants and commercial businesses for cashier and transaction management.
- Designed and implemented modern Flutter interfaces optimized for POS terminal environments and daily operational usage.
- Configured and integrated Sunmi Printer functionalities to enable real-time ticket generation and printing directly from POS terminals.
- Implemented Twilio-based WhatsApp notification features allowing customers to automatically receive transaction tickets digitally.
- Participated in debugging, issue resolution, and application performance optimization to improve system reliability and user experience.
- Collaborated with the technical team on feature enhancement and deployment processes for production-ready business solutions.

PROJECTS

Charà English Training Center NGO Platform

NGO Visibility & Information Platform

- Designed and developed a web platform aimed at increasing the online visibility and digital presence of Charà English Center.
- Created informative sections highlighting the organization's mission, achievements, activities, and community impact.
- Developed responsive pages focused on accessibility, user engagement, and modern presentation standards.
- Structured the platform to improve communication with visitors, partners, and potential supporters.
-

Takeshi Nihongo Gakkou Web Platforms

Educational & Cultural Digital Platforms

- Developed modern web platforms for Takeshi Nihongo Gakkou, recognized as a Japanese language school in West Africa.
- Built an informational platform introducing Japanese visitors to the history, culture, and tourism opportunities of Benin.
- Developed a dedicated platform providing detailed information about courses, schedules, learning sessions, and student registration processes.
- Designed responsive and accessible interfaces to improve user engagement and digital communication.
- Contributed to strengthening the organization's online presence through structured and modern digital solutions.
